1. EGR491-PYMLDS

ECE 491: Spc Top: Python Programming for Engineering Machine Learning Data Science.

THis repo was created by Paul Pace and all code is my own.
If you are a student in this class do note the following.

- Professors can see this code
- Copying code is against the schools honor code.
- I don't want to get Honor Coded becasue of your stupidity.

1.1. Class Goals

Learn Machine Learning in the snaky language.

1.2. File Struture

The class is organized into five progects. Each project will hold a README.md. This will include all data needed for project reports.

This files will then be compilsed into a *.pdf file such that it can be sent to canvas for submission.

An example report will be located in the /example directory.
